Gennius A2C is a pergola for all seasons. Available in single freestanding, double freestanding or top-mounted configurations, A2C is a durable aluminum pergola with a retractable roof. The PVC fabric roof retracts fully to reveal open sky when desired and closes to a water-tight seal when closed. Rainwater is directed into a system of integrated gutters and downspouts, hidden from view. Aluminum rails and posts are engineered for durability and excellent performance, season after season.

- Gennius A2C Single Freestanding.....Max width 42’8” x Max proj 23’10”
